The many details *behind just a few taps.*

Diane set up her **Caffevolve Blueprint** once: her User Profile, six Taste Profiles covering every waking hour, and a Workday Routine Plan. Now every cup is decided before she reaches for it. Here is her Thursday.

1 6:45 AM HOME

The first cup of the day

She walks to her brewer and identifies herself. Plan Check is waiting with the cup her plan holds for now. She sets tonight's bedtime, confirms, and brews.

WHAT WENT INTO THIS CUP	
Strength	Strong · AM Boost
Additives	Collagen + Vanilla · AM Boost
Size	12 oz, from her plan
Blend	90% caffeinated beans
Caffeine	161 mg: enough for now, room for the day

WHAT DIANE DID — *A few taps*

2 9:30 AM THE OFFICE

Same brewer experience, at work

Her office has a Caffevolve brewer, and it knows her too. She identifies herself, Plan Check shows her mid-morning cup, and she brews.

WHAT WENT INTO THIS CUP	
Strength	Medium · AM Focus
Additives	L-Theanine · AM Focus
Size	12 oz, from her plan
Blend	75% caffeinated beans
Caffeine	121 mg, balanced against the morning cup

WHAT DIANE DID — *A few taps*

3 12:30 PM THE CAFÉ

Lunch, and a latte

The café makes this one, but her plan counted it before the day began. CaffevolveGo shows the planned latte on her phone; she confirms it, and her day stays on track.

WHAT WENT INTO THIS CUP	
Drink	12 oz latte, made by the café
Caffeine	About 77 mg, already in her Workday plan
Plan Check	On plan, nothing to adjust

WHAT DIANE DID — *A few taps, on her phone*

4 5:30 PM HOME

One more before dinner

A late cup she once would have skipped. Plan Check has it ready: lighter and smaller, so tonight's sleep is already protected.

WHAT WENT INTO THIS CUP	
Strength	Light · Evening Ease
Additives	Vanilla · Evening Ease
Size	8 oz, from her plan
Blend	60% caffeinated beans
Caffeine	60 mg, leaving 75 mg at bedtime

WHAT DIANE DID — *A few taps*

226 mg
Her day's peak, well inside her 490 mg wake-hours limit

75 mg
Left at her 10:30 PM bedtime, within her 75 mg ceiling

A few taps
Each time: identify herself, confirm, brew. At the café, on her phone.

> *So much tailoring went into every cup. All Diane did was a few taps.*

Diane is a real prototype profile; her AM Boost, AM Focus and PM Deflate Taste Profiles come from it. Commute, Midday Lift, Evening Ease and the Workday Routine Plan were added to show a complete setup. Figures use the platform's caffeine model and Rebalance.
