FOR INVESTORS AND LICENSEES

Why the full setup matters

i

Set once, adjusted as you go

Your User Profile is set up once and can be edited anytime. Taste Profiles can change whenever you like, but they usually reflect long-standing preferences, so most stay put. A plan can cover a single day, the rest of an afternoon, or a saved routine that repeats across the week.

ii

The reward comes every day

Once it's in place, every cup takes just a few taps. The more of the week the Blueprint covers, the less a person does at the machine, and the more each cup feels made for them.

iii

The setup is the account

A complete Blueprint holds a person's limits, Taste Profiles and Routine Plans. It belongs to them, so it follows them to any Caffevolve™-enabled brewer.

WANT THE FULL PICTURE?

The Blueprint documents

The Documents section goes much further: how each tool is set up, screen by screen, in the User Guide; a full week with the Blueprint in place; and an interactive walkthrough of Diane planning a day and brewing it.
